GESHDO

Albin Hedin

"IT'S EASY - BUILD IT, TEST IT, LOVE IT"

Summary

Fullstack Developer with a passion for structured development driven by testing and maintainability. Proficient in turning business ideas into value for the end-user through cloud-native solutions on GCP and Azure. Experienced in building scalable APIs and frontend applications using C#, TypeScript, Node.js, Bun, React, Vue, and Golang.

Backend Development · API Architecture · Integrations · REST · Microservices · Event-Driven Architecture · Webhooks · C# · .NET · Typescript · Javascript · Vue.js · React.js · ASP.NET · Azure · GCP · Node · Scrum · Golang · Bun · CI/CD · Azure DevOps · GitHub

Experience

Senior Backend Developer · GESHDO Now AB

September 2026 - Current

Kompass · **INTERNAL PROJECT**

GESHDO SaaS product: a feedback and pulse tool for consulting firms that brings consultant sentiment, company belonging, and customer ratings into a single view without ever exposing an individual. Responsible for the backend and for integrations towards other systems and services via Azure Services, including conversational interfaces built on Azure Bot Service, where webhooks drive the event flow between the platform and the Teams bots.

Works AI enabled, using Claude and agentic workflows as a natural part of the daily development workflow.

TypeScript · C# · .NET · Azure Services · Azure Bot Service · Integrations · Webhooks · API Architecture · CI/CD

Senior Fullstack Developer · **IKEA (Ingka)** October 2021 - August 2026

Expansion · **CONTRACT**

Across multiple strategic initiatives at Ingka, the world's largest IKEA retailer, I have contributed as a fullstack developer designing and building digital platforms that support business-critical retail expansion workflows — from evaluating new markets to opening new retail locations. My responsibilities span database design, API development, integrations towards internal and external systems, data migration, frontend applications, infrastructure, CI/CD pipelines, monitoring of the services in production with Cloud Monitoring and Cloud Logging, and technical documentation — API and integration specifications, system architecture diagrams, and development guidelines maintained in Confluence.

Financial Approval Workflow System - Designed and built the backend and API layer for a platform used to secure financial approval of investment projects. Implemented complex business logic and dynamic approval flows. Built serverless event-driven architecture with Cloud Functions, scheduled data pipelines, and BigQuery analytics.

Market Discovery Platform - Developed the fullstack solution for a form-based evaluation tool for assessing and scoring potential new locations. Built RESTful APIs, database schemas in Firestore and PostgreSQL, and integrated Azure AD authentication. Implemented project assessment workflows with categorized scoring criteria and financial feasibility analysis.

Space Planning & Design Platform - Built a platform from the ground up for defining and validating new retail space configurations. Developed form-driven workflows with approval processes and AI-assisted input validation. Managed infrastructure provisioning and CI/CD pipelines with GitHub Actions.

Operational Playbook Platform - Built and maintained an information hub serving as the organizational knowledge base for internal methodologies and processes. Developed CMS-like workflows and implemented event-driven microservices using Cloud Functions and Pub/Sub for data synchronization and automated notifications.

Working in cross-functional Scrum teams throughout, collaborating closely with Product Owners, Tech Leads, fellow developers, and system architects to align the solutions with the overall product strategy. Participating in sprint planning, daily standups, retrospectives, and regular demos to both internal and external stakeholders. Worked AI enabled, using GitHub Copilot as a natural part of the daily development workflow.

TypeScript | GitHub Actions | Node.js | Bun | Express | React | Vue | Golang | Google Cloud Platform (GCP) | Cloud Functions | Pub/Sub | BigQuery | Firestore/Firebase | PostgreSQL | Cloud Monitoring | Cloud Logging | Docker | JIRA | Confluence | Integrations | Azure

Senior Fullstack Developer · **GESHDO Now AB** September 2021 - Current

EMPLOYMENT

GESHDO specializes in dynamic IT consulting, driven by a commitment to tailored solutions. We prioritize rapid delivery to align with your goals while managing costs effectively.

Our expertise spans all the major cloud platforms like AWS, Azure, and Google Cloud. Back-end development, with diverse languages and frameworks, equips us to solve complex challenges.

Our front-end consultants blend design finesse with technical precision to create seamless, visually appealing interfaces. GESHDO pushes boundaries to provide optimal, adaptable solutions for your organization.

Fullstack Developer · **Trygg-Hansa** May 2018 - September 2021

EMPLOYMENT

Worked with web-based sales applications serving external sales representatives. Managing several APIs and WCF services communicating with SQL databases and legacy insurance applications.

Managing and developing pipelines in Jenkins and Azure. Frontend development in ASP.NET, SharePoint and Vue.js. Extensive experience in testing business logic in backend. My role included designing and building custom software, simplifying complex rules, integrating data systems and ensuring quality.

C# .NET API ASP.NET Microsoft WCF SQL Vue 3 SharePoint Azure Jenkins Jfrog SonarQube.

IT Support · **EVRY** 2016 - 2017

EMPLOYMENT

First line support for municipalities, helped customers by phone and mail. Solving AD issues, access management and application troubleshooting. Gained knowledge and insight on how to interact with people with a wide range of technical skills, how to support and guide them.

Education

Bachelor Programme in Design of Information Systems

Lund University · 2014 - 2018

Bachelor of Science in Information Systems, major in Information Systems. IT-architecture development in object-oriented and web-based software. Information Systems and business development.

Certificates

GitHub	GitHub Copilot **2026** · GitHub Actions **2026**
Google Cloud Platform	Associate Cloud Engineer **2022 - 2025**
