GESHDO

Armin Filekovic

"Bringing the magic of clouds to your fingertips, one deployment at a time."

Summary

With a strong passion for technology and expertise in cloud platforms like AWS, GCP, and Azure, I pursued a career in IT, drawn by the ever-evolving landscape of new technologies. I thrive on challenges and continually seek opportunities for growth. Assisting others in resolving technical issues, navigating emerging technologies, and finding innovative solutions are not just sources of enjoyment but also areas where I excel.

Skills

Windows Server · Office 365 · AWS · Linux · Azure · Bash Scripting · Github · Github workflows · Terraform · GCP · PowerShell · Azure Devops · Asana · React · Node · Typescript · Python · Docker

Experience

Cloud Engineer · Inter IKEA Systems - ACE

January 2025 - Current

CONTRACT

Currently working in the Azure Excellence Team (ACE), providing support for Azure infrastructure and cloud solutions. Assigned to the DROP team, focusing on the setup and deployment of ERP system while contributing to automation initiatives and CI/CD pipeline development. Responsible for managing and optimizing Azure resources, implementing infrastructure-as-code practices, and ensuring scalable and secure environments. Collaborate with cross-functional teams to streamline deployment processes and apply best practices in cloud architecture, security, and compliance.

Azure · Azure Devops · Bicep · LCS · D365 Finance and operations · Powershell · Jira · Github Actions · Agentic AI · Power Platform · Power Apps

Cloud Engineer · Microniq Business Automation AB

November 2024 - January 2025

CONTRACT

Worked on setting up CI/CD pipelines for custom built applications, ensuring efficient, automated build and deployment processes. Collaborated on the design and implementation of infrastructure for a client-facing application, working closely with the customer to meet their requirements and establish a robust, scalable, and secure environment.

GCP · AWS · Terraform · Github · Github Actions · Cloud Run · Cloud DNS · Route53 · Cloud SQL · SecretsManager · Cloud Loadbalancer · Cloud Armor · Agentic AI

IT/Cloud Architect · Ingka Group

November 2023 - November 2024

Edge Engineering · **CONTRACT**

I'm part of an innovation team where we delve into the potential of Google Cloud Platform and other cutting-edge technologies. My role involves conducting research and experimentation to uncover fresh opportunities and applications for these tools. Working with solutions that could help the customer bring expenses down and trying out new tools.

GCP | Git | Github Actions | BigQuery | Looker Studio | Terraform | scripting (bash | python) | Open source license scanning tools (Ort | scancode | cdxgen).

Consulting Cloud Engineer · Stepstone

August 2023 - November 2023

Emerging Tech · **CONTRACT**

Cloud Engineer and an essential member of Stepstone's Emerging Tech unit, my primary role revolves around developing and working with cloud solutions. Within this dynamic environment, I collaborate with an innovative team to enable the creation of cutting-edge prototypes in the job-tech industry.

My expertise is centered on harnessing the capabilities of GPT-3, artificial intelligence (AI), and the latest advancements in web technologies, all while leveraging cloud technologies to their fullest potential. This comprehensive approach ensures that Stepstone remains at the forefront of the ever-evolving job-tech landscape by seamlessly integrating cloud-based solutions into our innovative projects.

AWS | CDK | Lambda | API Gateway | TypeScript | JavaScript

Cloud Engineer · J2 Sourcing

March 2023 - July 2023

CONTRACT

in my role, I was instrumental in optimizing our cloud environments, particularly within the Azure platform. I also provided crucial support to our development team in setting up a production environment for a customer-facing application in Azure.

My responsibilities included configuring Continuous Integration and Continuous Deployment (CI/CD) pipelines using Azure DevOps and deploying the application as either a static web app or a containerized app, depending on project requirements. This required a keen eye for detail, expertise in Azure infrastructure and deployment best practices, and collaborative teamwork to ensure a secure and high-performing solution tailored to our customer's needs, leveraging Azure's Static Web App and Container Apps services.

Microsoft Azure | Azure Devops | Devops Pipelines | Azure Container Apps | Static Web App | Application Insights | Azure Keyvault

Cloud Engineer · GN Hearing

October 2021 - February 2023

Lea · **CONTRACT**

As the infrastructure lead, I was responsible for leading the devops side of building new and innovative applications for hearing aids. My team and I were committed to utilizing the latest technologies and industry best practices to create robust and scalable solutions that met the needs of our users.

I managed the infrastructure and deployment pipeline using tools such as Azure, Azure DevOps, and GCP. This included ensuring that our systems were secure, highly available, and easily maintainable.

I also collaborated closely with other teams and stakeholders to ensure that our solutions aligned with the overall goals and objectives of the organization. Together with the app engineers we were able to deliver innovative solutions that had a positive impact on the lives of our users.

Microsoft Azure | GCP | Function apps | App service plans | CosmosDB | Keyvault | Static Webpages | DNS | CDN | SQL | Azure Devops | Terraform | Azure Container Apps | Data factory | MS AppCenter | Terraform | Terraform Cloud | GCP | Cloud Run | Cloud Build | Monitoring | Uptime Checks | Github Actions | Github Worfklow

Cloud Engineer · IKANO Bank

March 2021 - September 2021

Cloud Team · **CONTRACT**

As a member of the infra team at IKANO Bank, I am responsible for configuring, automating and maintaining the bank's AWS environment. This includes managing virtual desktop infrastructure (VDI) workspaces, overseeing application management, managing user access and implementing tagging for accounts and instances for better management and cost optimization.

AWS | Certificate Manager | Security Hub | Cloudformation | EC2 | S3 | DynamoDB | VPC | Workspaces | IAM | Jira | ServiceNow | Banking

Cloud Engineer · GESHDO

March 2021 - Current

EMPLOYMENT

Working as a consultant with a focus on cloud infrastructure. GESHDO specializes in dynamic IT consulting, driven by a commitment to tailored solutions. We prioritize rapid delivery to align with your goals while managing costs effectively. Our expertise spans all the major cloud platforms like AWS, Azure, and Google Cloud. Back-end development, with diverse languages and frameworks, equips us to solve complex challenges. Our front-end consultants blend design finesse with technical precision to create seamless, visually appealing interfaces. GESHDO pushes boundaries to provide optimal, adaptable solutions for your organization.

Third-line Support · Data Ductus

July 2020 - October 2020

I assisted a customer in simplifying and automating the installation of their hardware firewall using a Raspberry Pi. I configured the Raspberry Pi to install all necessary applications for the firewall to function properly, and implemented routing rules to ensure proper connectivity. Additionally, I created scripts that automatically detected when a 3G modem was connected to the Raspberry Pi, further reducing downtime and simplifying the installation process for the customer.

Bash scripting | Raspberry Pi configuration

Consulting Third-line Support · Data Ductus

March 2020 - March 2021

I was actively involved in providing support for a Identity Server as a service offering for our customers(Curity). This included resolving issues when the service was down, implementing new releases of Curity through Azure DevOps CI/CD pipelines, troubleshooting Azure logs, and providing assistance to customers related to the service. Additionally, I assisted the 2nd line service desk with onboarding and creating manuals to aid in the onboarding process for new team members. My technical expertise includes working with Microsoft Azure and Kubernetes.

Microsoft Azure | Kubernetes service(AKS) | Log analytics | Azure Devops | Azure Devops Pipelines | Service Desk Plus | Curity | Banking

Third-line Support · Data Ductus

December 2019 - March 2021

I joined the GiP (Common IT-Platform) team, where my role was to assist a large organization in centralizing their IT infrastructure. My main responsibilities were to assess their current infrastructure (network and hardware) to determine compatibility with GiP requirements, and to prepare data for the central team to facilitate the migration of users to the new platform. I also acted as onsite support during the migration phase, providing assistance to ensure a smooth transition for the users.

IT Technician · Manpower/Experis

September 2019 - December 2019

EMPLOYMENT

I successfully assisted a major customer in migrating their users to a centralized IT platform by ensuring the proper computers were selected for migration and overseeing the entire installation process. In the event of any errors, I promptly and effectively troubleshooted and resolved them in collaboration with an additional support team who assisted with SCCM image issues.

Education

IT-Supportspecialist

Ec Utbildning · 2018 – 2019
