GESHDO

Delshad Kogi

“If you can think it, you can build it.”

Summary

I am a curios and driven web-developer. A fullstack developer that have huge passion for web development. When building an application, my ambition is to write code that is easy to read, maintainable and scalable, making the application as good as possible. In my free time i like to read and learn new technologies. Recent intereset is AI with vector databases and data embeedings.

Skills

Vue.js · TypeScript · GraphQL · Jest · Tailwind · CSS/SCSS · Prompt Engineering · AI/ML · Embedding data · ReactJS · NextJS 13/14 · Node.js · Playwright · Gsap Animations · Express.js · MaterialUI · Microservices · MongoDB · AngularJS · Google Cloud Platform · PostgreSQL · BigQuery · AWS · GO · Javascript

Experience

Senior Fullstack Developer · Ingka (IKEA)

May 2024 - Current

CONTRACT

This assignment involves two primary products. Built a content management system with a custom document editor that have been delivered and hand over. Currently, I'm building and improving a case management system.

React · Go · GCP · OpenAI API · Semantic Search · Typescript · ESI

Fullstack Developer · GESHDO Now AB

March 2024 - Current

EMPLOYMENT

Currently working on internal project that will be published on GESHDO's application marketplace.

The tool is a CV Scanner, it's an application to match consultants resumes against job descriptions with help of AI and vector embeddings.

NextJs14 · Go · GCP · MongoDB Atlas · OpenAI API · Vector Embedding · Semantic Search

Fullstack Engineer · GetAccept

October 2023 - March 2024

Deal Room · **EMPLOYMENT**

Worked with the GetAccept Dealroom module, mostly backend.

AWS · Node.js · JavaScript · TypeScript · Vue3 · GitHub · GraphQL · Jest

Fullstack Developer · **Ingka (IKEA)** January 2021 - September 2023

Jobba/Checka · **CONTRACT**

This assignment involves two primary products. a capacity allocation planning tool for staff and a system for managing equipment lending to employees. The equipment lending system includes items like home office equipment for remote work and uniforms for store personnel. Both systems have been translated into numerous languages and implemented for colleagues worldwide.

In the team, my role is Tech Lead with oversight of the whole project but with primarily responsible for the backend services. However, I have also extensively contributed to the frontend components.

GCP (mainly Cloud Run | FireStore | BigQuery | Cloud Functions | Cloud Build & PubSub) | Node.js | Express.js | Vue.js | JavaScript | TypeScript | React | GitHub

IT Consultant · **GESHDO Now AB** January 2021 - September 2023

EMPLOYMENT

Worked as an IT consultant with a Cloud Development specialization.

Fullstack Engineer · **Side projects** Ongoing

Catchmemo / GetWCAG

On my spare time I sit with side-projects and learn more about exciting technologies.

Recent projects:

• CatchMemo is a photo-sharing app that lets anyone instantly upload and view event photos using a QR code. Developed for both personal and professional use, with powerful customization capabilities.

• GetWCAG is an automated accessibility scanner that checks websites for WCAG and EAA compliance, detects violations, and generates actionable reports.

Typescript | Nodejs | Express | Firebase | Firestore | GCP | Docker | OpenAI API | Vector/Embeddings | Prompt engineering | NextJS 14/15 | Playwright | JWT

Fullstack Developer · **Aid It To (Startup/Co-Founder)** April 2020 - December 2020

The AIDITTO initiative is a result of a Vinnova-funded project completed during 2020. It has framed how actor-common, digital, regional communication should function for an effective digital crisis response on regional level, to support citizens and businesses with accessible information, clear calls-to-actions for help needed and help offered, and a safe and clear way in for the public for requests and responses.

Fullstack Developer · **Nidulus AB** April 2020 - November 2020

Worked with the Nidulus Platform which is a Microservices platform. Developed a SaaS-app for companies to share their selected and filtered data through an api.

Front-End Developer Intern · **Softhouse** February 2020 - March 2020

Refactor a big in-house project from angularJS to ReactJS.

Education

Fullstack Javascript Developer
Lernia · 2018 - 2020
